

# Phone Card from trusecurity

Customers all over the world rely on our bespoke papers, used in the production of pre-paid phone cards and other scratch cards, such as lottery tickets.

These papers have a unique, confidential number which the customer reveals, usually with a coin.

Innovation is our watchword, **constantly reviewing and redesigning** to ensure that your products can never be compromised.

## Security features

### The coating

This is the foundation on which our layers of additional security features are added.

- Smoother paper, with controlled absorbency, improving the look, feel and durability.
- Our own specialist coatings.
- Customers can add further levels of protection, such as security inks and holograms.

### Opacifying layer

- A white, print receptive and scratch resistant coating.

### Security numbering

- Numbers can be printed on to the coating and then over-printed with a scratch-off layer, usually by silkscreen.

To find out more about our complete range, please see the enclosed security features card, or contact us.

## Components

- Available in a range of substances, up to 300 gsm in weight.
- Base paper
  - High quality paper board.
  - Available in a range of basis weights.
  - FSC accredited.
  - Clay coated or uncoated.
  - Manufactured to ISO 9001 standard.

## Benefits

- It is ideal for mobile phone top-up cards and lottery scratch cards.
- Low basis weight paper is more cost effective than using laminated board.
- Impossible to split the card (in order to read the number under a high intensity light).
- Excellent print results with flexo (UV and water based), water-based inkjet (opaque coated side only), offset litho, letterpress, silkscreen gravure.

## How do you want your paper?

- Industry leading converting equipment guarantees exceptional finish and accuracy for your product.
- Temperature and humidity controlled environment ensures stable and flat sheets.
- Reel width (180 – 2100mm, 1500mm max for laminates) or precision sheet (width 300 – 2000mm, length 348 – 1803mm).
- Bulk or ream wrapped.

“ Our cards cannot be split ”
