**tru** quality  
**tru** service  
**tru** performance

# Why choose trusecurity?

## Because all our coatings have **security locked in**

trusecurity coated paper and film gives you the ultimate protection – **it's all in the layers.**

And we give you **3 levels of defence** to help against tampering, counterfeiting and aid brand protection.

- 1. We source the best** – security paper and film that already has elements of protection embedded in it. Then we enhance it further.
- 2. Our clay coating** enables a range of other security measures to be added directly, such as fluorescent, phosphorescent and IR taggants. Plus, it improves the printer's ability to add microtext, use a variety of security inks, affix holograms and foils.
- 3. Our specialist coatings** add layer after layer of added features, from adhesives to chemical sensitization to covert images printed in-between coats. When we say 'locked in', we really mean it.

## Because **we know exactly what we are doing**

🛡️ We have **170 years of coating and converting experience**, with an unparalleled reputation all over the world, making everything from postage stamps to visas to tax stamps.

🛡️ We stay several steps ahead of the counterfeiters, through **constant innovation**, working in partnership with leading edge high security printers and technology providers. Our technical expertise across the market cannot be matched.

🛡️ We operate a **Chain of Custody**. We do everything in-house and on one site, maintaining security and integrity throughout the lifecycle of the product.

We only sell our products to qualified and authorized printers and packaging converters.

Our security customers have to agree to follow our Chain of Custody policies.

- secure storage
- production documentation
- waste management

🛡️ From enquiry to delivery, we work with customers to deliver the best. Whatever problem you need to solve, or whatever great idea you've got, we want to hear from you.

## It's all in the layers

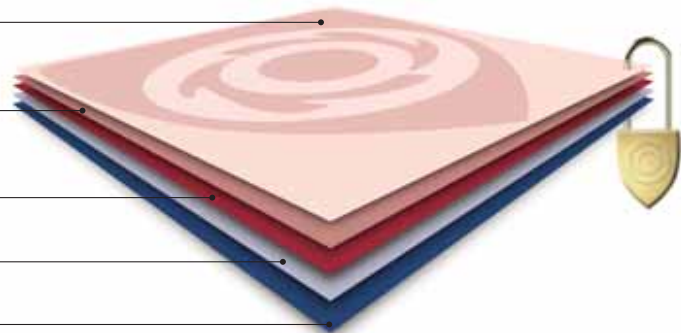

Coatings create improved adhesion and quality for holograms and foils

Coating allows enhanced security printing, such as speciality inks and microtext

Additional, bespoke layers of security features

Our base paper, rich with security features

Secure adhesives

## Because of our extensive product range

We are experts in all the established markets for security printing. And our specialist security coatings division ensures that, whatever your security needs are, we can help. We can apply our coating expertise, wherever you need it.

- 🛡️ Tax Stamp paper
- 🛡️ Visa paper
- 🛡️ Postage Stamp paper
- 🛡️ Phone Card
- 🛡️ Ticket and Voucher paper
- 🛡️ Security Labels
- 🛡️ Document paper
- 🛡️ Security Coatings

## Because of our heritage

As well as being a leading, **UK, independent, coating and converting company**, we are part of the **Tullis Russell Group**, specialists in the papermaking and coating industry for nearly two centuries.

**Our extensive product range** includes security papers and films, ceramic and textile transfer papers, plus a speciality resource for developing solutions for any challenges customers have for us.

We combine a very **contemporary** drive for product innovation, with a **tradition** of great service. We are recognized, world-wide, for our technical excellence.

Customers in over 120 countries throughout the world are proof that we create papers and films which consistently exceed expectations.

“ Whatever your security needs are, we can help ”
