# Ticketboard

## Product Information

### Printing and Conversion

**Ticket Board** is suitable for offset litho, sheet and web printing, flexography and non-impact print processes, including thermal transfer.

**Ticket Board** gives excellent results when scored, die cut, folded and perforated.

### Applications

**Ticket Board** is designed for the following applications:

Transportation tickets, such as train tickets, airline tickets and boarding cards.

It is also suitable for car park, event and swing tickets.

**Ticket Board** is ideal for all general ticket applications. It can also be used as a base product for conversion into thermal tickets.

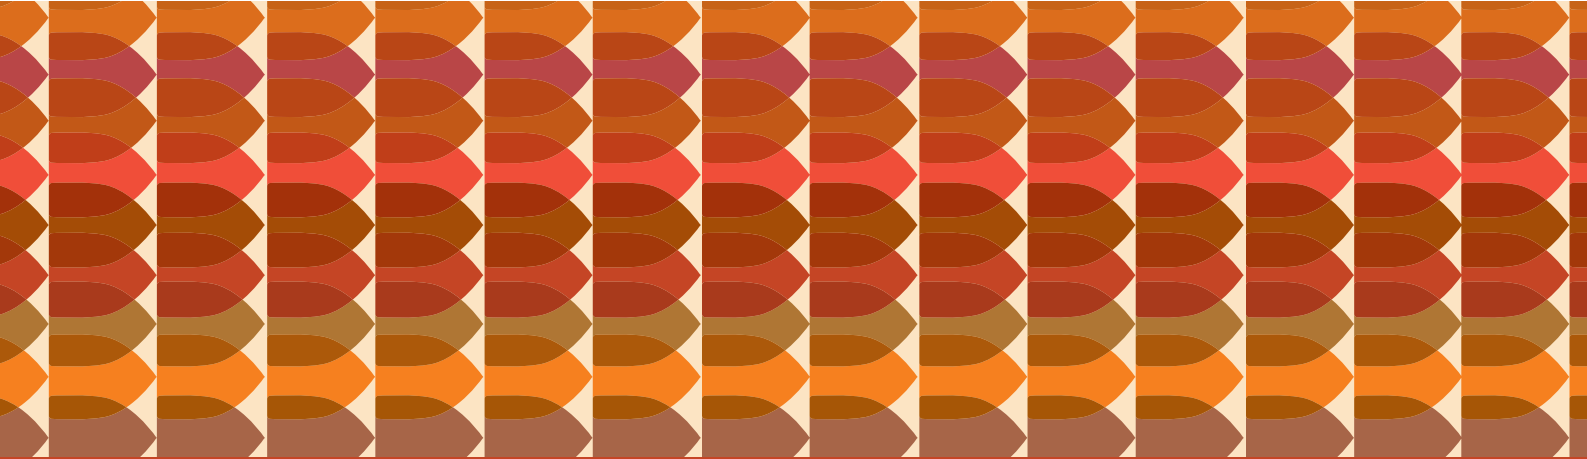

**Ticket Board** has a specially treated surface ensuring it is suitable for use with both film and ink based magnetic strip technologies. The surface treatment also ensures optimal feeding performance through automatic ticket dispensing and processing systems.

**Ticket Board** complies with the European specification EN753-1 relating to Thin Flexible Cards. The 161 g/m<sup>2</sup> product also complies with the IATA (International Air Transport Association) specification for ATB (Automatic Ticket Board).

**Ticket Board** is a UV Dull product and is compatible with all leading OCR and MICR readers to allow trouble free encoding and sorting.

**Ticket Board** is fully recyclable and is made from 100% elemental chlorine free (ECF) pulps, sourced from sustainable managed forests.

**Ticket Board** is manufactured to precise and controlled specifications. Tullis Russell is registered under the BS EN ISO 9002 quality assurance scheme and the BS EN ISO 14001 environmental standard.
